NEW QUESTION: 1
DRAG DROP

Answer:
Explanation:

Explanation:
To remember which type of cable you should use, follow these tips:
- To connecttwo serial interfacesof 2 routers we useserial cable
- To specify when we use crossover cable or straight-through cable, we should remember: Group 1:Router, Host, Server Group 2:Hub, Switch One device in group 1 + One device in group 2: usestraight-through cable Two devices in the same group: usecrossover cable For example: we use straight-through cable to connect switch to router, switch to host, hub to host, hub to server... and we use crossover cable to connect switch to switch, switch to hub, router to router, host to host...)

NEW QUESTION: 2
Which schema is used for defining the field structure of an analytic object?
A. XSL Schema
B. XSD schema
C. Database schema
D. Apache Avro schema
Answer: D
Explanation:
Using Schemas to Define the Fields of Analytics Objects
You can import an Apache Avro schema file to define the field structure of your analytics object.
To import a schema file, your analytics object must not have any fields defined.
The namespace and object name in your schema file must match the name of the analytics object that you created.
* After you create your analytics object, click Import Schema.
The file browser dialog box appears.
* Select a valid Avro schema file from your computer and click Open.
For more information about Avro schemas, see Apache Avro.
The field structure defined in the schema file appears in the Fields section.
* Click Save.
The field structure defined in your Avro schema file is imported to your analytics object.
