Some IT workers feel tired about their job and apply for EC-COUNCIL certification as their career breakthrough, The hit rate of 312-39 training pdf is up to 100%.

### **NEW QUESTION: 1**

A company manages capital equipment for an electric utility company. The company has a SQL Server database that contains maintenance records for the equipment.

Technicians who service the equipment use the Dynamics 365 Field Service mobile app on tablet devices to view scheduled assignments. Technicians use a canvas app to display the maintenance history for each piece of equipment and update the history.

Managers use a Power BI dashboard that displays Dynamics 365 Field Service and real-time maintenance data.

Due to increasing demand, managers must be able to work in the field as technicians.

You need to design a solution that allows the managers to work from one single screen.

What should you do?

- A. Add the maintenance history app to the Field Service Mobile app.
- B. Create a new maintenance canvas app from within the Power BI management dashboard.
- C. Add the maintenance history app to the Power BI dashboard.
- D. Add the manager Power BI dashboard to the Field Service mobile app.

**Answer: C**

Explanation:

Explanation

Power BI enables data insights and better decision-making, while Power Apps enables everyone to build and use apps that connect to business data. Using the Power Apps visual, you can pass context-aware data to a canvas app, which updates in real time as you make changes to your report. Now, your app users can derive business insights and take actions from right within their Power BI reports and dashboards.

#### **NEW QUESTION: 2**

Which option is a feature of the Distribution layer of Campus Hierarchy?

- A. Defines a summarization boundary for network control plane protocols
- B. Participates solely in the access of the core distribution block
- C. Serves as an aggregator
- D. Provides for connectivity in both the data center and other areas and services within the network

**Answer: C**

#### **NEW QUESTION: 3**

Refer to the exhibit.

Based on the LACP neighbor status, in which mode is the SW1 port channel configured?

- A. active
- B. auto
- C. passive
- D. mode on

**Answer: A**

Explanation:

Explanation

From the neighbor status, we notice the "Flags" are SP. "P"

here means the neighbor is in Passive mode. In order to create an Etherchannel interface, the (local) SW1 ports should be in Active mode. Moreover, the "Port State" in the exhibit is "0x3c" (which equals to "00111100 in binary format). Bit 3 is "1" which means the ports are synchronizing -&gt; the ports are working so the local ports should be in Active mode.
