Answer: D

NEW QUESTION: 3

Your company has a main office that contains several servers and several users. The main office contains a file server named Server1 that runs Windows Server 2012.

The users access a large report file that is created on Server1 each day.

The company plans to open a new branch office. The branch office will contain only client computers.

You need to implement a solution to reduce the amount of bandwidth used by the client computers in the branch office to download the report each day.

What should you do?

More than one answer choice may achieve the goal. Select the BEST answer.

- A.** Install the BranchCache for network files role service on Server1. Configure the client computers to use Branchcache in distributed mode.
- B.** Configure the offline settings of the shared folder that contains the report.
- C.** Enable the Background Intelligent Transfer Service (BITS) feature on Server1 and on each client computer in the branch office. Move the report to a web folder.
- D.** Install the BranchCache for network files role service on Server1. Configure the client computers to use BranchCache in hosted cache mode.

Answer: A

Explanation:

Distributed cache mode. In this mode, branch office client computers download content from the content servers in the main office and then cache the content for other computers in the same branch office.

Distributed cache mode does not require a server computer in the branch office.
