It might alter your unsatisfactory lives, and lead you to a better future!

NEW QUESTION: 1
What is the minimum number of H.225 messages required to establish an H.323 call with bidirectional media?
A. 0
B. 1
C. 2
D. 3
E. 4
Answer: C

Explanation:
Explanation/Reference:
Explanation:
A typical H.245 exchange looks similar to below figure
After this exchange of messages, the two endpoints (EP) in this
figure would be transmitting audio in each direction. The
number of message exchanges is numerous, each has an important
purpose, but nonetheless takes time.
For this reason, H.323 version 2 (published in 1998) introduced
a concept called Fast Connect, which enables a device to
establish bi-directional media flows as part of the H.225.0
call establishment procedures. With Fast Connect, it is
possible to establish a call with bi-directional media flowing
with no more than two messages, like in figure 3.
Fast Connect is widely supported in the industry. Even so, most
devices still implement the complete
H.245 exchange as shown above and perform that message exchange
in parallel to other activities, so there is no noticeable
delay to the calling or called party.

NEW QUESTION: 2
A Unity system LUN has a daily snapshot schedule with a
Retention Policy of seven days. A hardware failure results in a
double fault of theLUN. Which snapshot behavior will be
experienced?
A. Data restoration is available from the newest snapshot, all
others are unavailable
B. Data restoration is available from the oldest snapshot, all
others are unavailable
C. All of the snapshots will be unavailable to restore data
from
D. All of the snapshots will be available torestore data from
Answer: A

NEW QUESTION: 3
You are developing a medical records document management
website. The website is used to store scanned copies of patient
intake forms. If the stored intake forms are downloaded from
storage by a third party, the content of the forms must not be
compromised.
You need to store the intake forms according to the
requirements.
Solution:
* Create a Azure Key Vault key named skey.
* Encrypt the intake forms using the public key portion of
skey.
* Store the encrypted data in Azure Blob storage
Does the solution meet the goal?

A. Yes
B. No
Answer: B
