NEW QUESTION: 1
Scenario: A Citrix Architect needs to design a multi-datacenter XenApp and XenDesktop environment that will use Provisioning Services (PVS) to manage Virtual Delivery Agent (VDA) machine images. Each datacenter will have a separate Provisioning Services farm. During the design discussions, the architect creates a diagram to depict the way vDisk files will be replicated between PVS farms, based on the available storage for the vDisk Stores.
Click the Exhibit button to view the diagram.

Overall, the customer has identified the following objectives for the image replication process:
Minimize the administrative time required to replicate images between farms

Must be usable by storage administrators without PVS farm administrative permissions

Can handle network interruptions without administrator intervention
