#### **NEW QUESTION: 2**

You are in the early stages of planning a migration to GCP. You want to test the functionality of your hybrid cloud design

before you start to implement it in production. The design includes services running on a Compute Engine Virtual Machine instance that need to communicate to on-premises servers using private IP addresses. The on-premises servers have connectivity to the internet, but you have not yet established any Cloud Interconnect connections. You want to choose the lowest cost method of enabling connectivity between your instance and on-premises servers and complete the test in 24 hours. Which connectivity method should you choose?

- A. 50-Mbps Partner VLAN attachment
- B. Dedicated Interconnect with a single VLAN attachment
- C. Cloud VPN
- D. Dedicated Interconnect, but don't provision any VLAN attachments

**Answer: C**

### **NEW QUESTION: 3**
