First and foremost, we cooperate with the most authoritative payment platform, You only need to scan your

Professional-Cloud-Security-Engineer test score report to us together with your receipt ID.

NEW QUESTION: 1

Which one of the following is the key techniques to create cloud infrastructure?

- A. Data Classification
- B. Automation
- C. Orchestration
- D. Orientation

Answer: C

Explanation:

The key techniques to create a cloud are abstraction and orchestration. We abstract the resources from the underlying physical infrastructure to create our pools, and use orchestration (and automation) to coordinate carving out and delivering a set of resources from the pools to the consumers. As you will see, these two techniques create all the essential characteristics we use to define something as a "cloud."
