NEW QUESTION: 1

What is an elastic IP?

- A. a peering route
- B. a nonroutable address
- C. an Internet routable address
- D. a load-balanced IP address

Answer: C

NEW QUESTION: 2

A university is trying to decide whether or not to advertise a new post-graduate degree programme. The number of students starting the programme is dependent on economic conditions. If conditions are poor, it is expected that the programme will attract 40 students without advertising. There is a 60% chance that economic conditions will be poor. If economic conditions are good it is expected that the programme will attract only 20 students without advertising. There is a 40% chance that economic conditions will be good.

If the programme is advertised and economic conditions are poor, there is a 65% chance that the advertising will stimulate further demand and student numbers will increase to 50. If economic conditions are good, there is a 25% chance the advertising will stimulate further demand and numbers will increase to 25 students.

The profit expected, before deducting the cost of advertising, at different levels of student numbers are as follows:

The cost of advertising the programme will be \$15,000.

Required:

Demonstrate, using a decision tree, whether the programme should be advertised.

- A. Yes, the programme should be advertised as the profit will be \$92 000
- B. No, the programme should not be advertised as there will be a loss \$82 000
- C. Yes, the programme should be advertised as the profit will be \$82 000
- D. No, the programme should not be advertised as there will be a loss \$92 000

Answer: C

NEW QUESTION: 3
