fšãf³ã, 'ã, çã, -ã, .ãfšãf³ã•@ãfªã, ¹ãf^ã•<ã, %â>žç-"ã, "ãfªã, çã•«çš»â  
<•ã•-ã€•æ-fã•-ã•„é †â°•ã•«ã, |ã•¹ã•¾ã•™ã€,

## Answer:

Explanation:

Explanation

Tier 7 and 8 data access is constrained to single endpoints managed by partners for access Step 1: Set the Allow Azure Services to Access Server setting to Disabled Set Allow access to Azure services to OFF for the most secure configuration. By default, access through the SQL Database firewall is enabled for all Azure services, under Allow access to Azure services. Choose OFF to disable access for all Azure services.

Note: The firewall pane has an ON/OFF button that is labeled Allow access to Azure services. The ON setting allows communications from all Azure IP addresses and all Azure subnets. These Azure IPs or subnets might not be owned by you. This ON setting is probably more open than you want your SQL Database to be. The virtual network rule feature offers much finer granular control.

Step 2: In the Azure portal, create a server firewall rule Set up SQL Database server firewall rules Server-level IP firewall rules apply to all databases within the same SQL Database server.

To set up a server-level firewall rule:

- \* In Azure portal, select SQL databases from the left-hand menu, and select your database on the SQL databases page.

- \* On the Overview page, select Set server firewall. The Firewall settings page for the database server opens.

Step 3: Connect to the database and use Transact-SQL to create a database firewall rule Database-level firewall rules can only be configured using Transact-SQL (T-SQL) statements, and only after you've configured a server-level firewall rule.

To setup a database-level firewall rule:

- \* Connect to the database, for example using SQL Server Management Studio.

- \* In Object Explorer, right-click the database and select New Query.

- \* In the query window, add this statement and modify the IP address to your public IP address:

- \* EXECUTE sp\_set\_database\_firewall\_rule N'Example DB Rule','0.0.0.4','0.0.0.4';

- \* On the toolbar, select Execute to create the firewall rule.
