Many people are willing to choose our products.

NEW QUESTION: 1

Filter http rule

A. allowed traffic when url server is down

Answer: A

Explanation:

```
filter url http 0.0.0.0 0.0.0.0 0.0.0.0 0.0.0.0 allow
```

The allow option, at the end of the filter URL statement, indicates that users should be allowed external HTTP access in the event the security appliance cannot communicate with Websense. If omitted and the Websense server is unavailable, users lose all HTTP access to the Internet.

The allow option causes the ASA to forward HTTP traffic without filtering when the primary filtering server is unavailable.

NEW QUESTION: 2

On an Alcatel-Lucent 7750 SR, why must the MTU be explicitly

set when configuring an IES spoke termination to a VPLS?

- A. By default, a VPLS signals an MTU based on the network port.
- B. By default, an IES sets its ip-mtu to the VC MTU of the VPLS.
- C. By default, an IES uses an MTU based on the network port.
- D. By default, an IES uses an MTU value based on its SAP.

Answer: C

NEW QUESTION: 3
