Answer: A

NEW QUESTION: 3
A retail company is currently hosting a Java-based application in its on-premises data center.
Management wants the DevOps Engineer to move this application to AWS. Requirements state that while keeping high availability, infrastructure management should be as simple as possible.
Also, during deployments of new application versions, while cost is an important metric, the Engineer needs to ensure that at least half of the fleet is available to handle user traffic.
What option requires the LEAST amount of management overhead to meet these requirements?
A. Create an AWS CodeDeploy deployment group and associate it with an Auto Scaling group configured to launch instances across subnets in different Availability Zones. Configure an in- place deployment with a custom deployment configuration

with the MinimumHealthyHosts option set to type FLEET_PERCENT and a value of 50.
B. Create an AWS CodeDeploy deployment group and associate it with an Auto Scaling group configured to launch instances across subnets in different Availability Zones. Configure an in- place deployment with a CodeDeploy.HalfAtAtime configuration for application deployments.
C. Create an AWS Elastic Beanstalk Java-based environment using Auto Scaling and load balancing.
Configure the network options for the environment to launch instances across subnets in different Availability Zones. Use "Rolling" as a deployment strategy with a batch size of 50%.
D. Create an AWS Elastic Beanstalk Java-based environment using Auto Scaling and load balancing.
Configure the network setting for the environment to launch instances across subnets in different Availability Zones. Use "Rolling with additional batch" as a deployment strategy with a batch size of 50%.
Answer: A

NEW QUESTION: 4
When configuring sites, you have two properties related to price groups: the default price group and additional price groups. Consider the following scenario:
* Site UShas theUS Dollarprice group set as its default price group.
* Site Canadahas theCanadian Dollarprice group as its default price group, but needs a second price group for US dollars.
* It can either share theUS Dollarprice group withSite USor have a separateUS Dollars2price group.
Under what condition shouldSite Canadause the separateUS Dollars2as its additional price group?
A. Site Canada has two languages and two currencies, and therefore needs dedicated price groups to accurately display prices
B. US dollar prices differ between Site US and Site Canada
C. Reports in Oracle Business Intelligence Enterprise Edition need to separate sales totals in US dollars by site
D. The two countries have different sales tax rate calculations
Answer: D
