NEW QUESTION: 1

You install a copy of Mysql 5.6.13 on a brand new Linux server by using RPM packages. The server starts successfully as verified by the following commands:

```
$ pidof mysqld  
3132
```

```
$ tail - n2 /var/lib.mysql/hostname.err
```

```
2013-08-18 08:18:38 3132 [Note] /usr/sbin/mysqld: ready for connections.
```

```
Version: '5.6.13-enterprise-commercial-advanced' socket:
```

```
 '/tmp/mysql.sock' port;
3306 Mysql Enterprise Server - Advanced Edition (Commercial)
You attempt to log in as the root user with the following
command:
$mysql -u root
ERROR 1045 (28000): Access denied for user 'root'@'localhost'
(using password: NO) Which statement is true about this
scenario?
A. The local root user must log in with a blank password
initially: mysql -u root -p.
B. The mysql_install_bd post-installation script used -
random-password.
C. The RPM installation script sets a default password of
password for new installations.
D. New security measures mean that the
mysql_secure_installation script must be run first on all new
installations.
Answer: A
```

NEW QUESTION: 2

A company has three different environments: Development, QA, and Production. The company wants to deploy its code first in the Development environment, then QA, and then Production. Which AWS service can be used to meet this requirement?

- A.** Use AWS CodeDeploy to create multiple deployment groups.
- B.** Use AWS CodeCommit to create multiple repositories to deploy the application.
- C.** Use AWS CodeBuild to create, configure, and deploy multiple build application projects.
- D.** Use AWS Data Pipeline to create multiple data pipeline provisions to deploy the application.

Answer: A

Explanation:

<https://docs.aws.amazon.com/codedeploy/latest/userguide/deployment-groups.html>

"You can associate more than one deployment group with an application in CodeDeploy. This makes it possible to deploy an application revision to different sets of instances at different times. For example, you might use one deployment group to deploy an application revision to a set of instances tagged Test where you ensure the quality of the code. Next, you deploy the same application revision to a deployment group with instances tagged Staging for additional verification. Finally, when you are ready to release the latest application to customers, you deploy to a deployment group that includes instances tagged Production. "

NEW QUESTION: 3

A user calls the help desk because a folder containing critical

business files is missing from the local drive. The user is adamant that the folder was there the previous day, and cannot understand why it is gone. The technician views the properties of the parent folder and sees a back up listed on the "Prior Versions" tab. According to the theory of troubleshooting, which of the following is the technician's NEXT step?

- A. Document findings, actions and outcomes
- B. Establish a theory of probable cause
- C. Establish a plan of action and implement the solution
- D. Verify full system functionality and implement preventive measures

Answer: B
