Try our Nokia Nuage Networks Openstack Integration free demo questions, If you want to know more details about Nokia 4A0-N04 preparation labs please feel free to contact with us any time, it is our pleasure to reply and solve problem with you.

It also prepares you to manage your time within the given frame of reference for the actual Nokia 4A0-N04 exam, Tinova-Japan provides unofficial study materials, and educational material which doesn't intend to substitute the official materials provided by other company [4A0-N04](#) displayed in the web-site.The usage of third party logos does not represent an endorsement or an association with any other company.

NEW QUESTION: 1

You have an Azure subscription named Subscription1 that contains the resources shown in the following table.

The status of VM1 is Running.

You assign an Azure policy as shown in the exhibit. (Click the Exhibit tab.)

You assign the policy by using the following parameters:

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Not allowed resource types (Deny): Prevents a list of resource types from being deployed. This means this policy specifically prevents a list of resource types from being deployed. So that refers that except deployment all the other operations like start/stop or move etc. are not prevented. But to be noted if the resource already exists, it just marks it as non-compliant. Replicated this scenario in LAB keeping VM running and below are the outcome :

- * VM is not deallocated
- * Able to stop and start VM successfully.
- * Not able to create new virtual network or VM.
- * Not able to modify VM size.
- * Not able change the address space of the virtual network.
- * Successfully moved virtual network and VM in another resource group.

Statement 1 : Yes

Based on above experiment the policy will mark the VNET1 as non-compliant but it can be moved to RG2 . Hence this statement is true.

Statement 2 : No

Based on above experiment the policy will mark the VM as non-compliant but it will still be running, not deallocated. Hence this statement is False.

Statement 3 : No

Based on above experiment the address space for VNET2 can not be modified. Hence this statement is False.

NEW QUESTION: 2

Mike from Miller Inc. created a forecast showing a need for 100 staplers by June 1. Currently there are 10 staplers in inventory. Existing sales orders have a committed quantity of 50 staplers.

When Mike runs MRP to produce a production order to manufacture staplers, the recommended production order is for 90 staplers. Why does MRP recommend this amount?

Please choose the correct answer.

Response:

A. The planning definitions are set to consume forecasts.

- B. The minimum stock requirement is set to 10.
- C. The maximum stock requirement is set to 90.
- D. MRP never considers sales orders as demand

Answer: A

NEW QUESTION: 3

You are configuring an administration connection to SharePoint Online. You need to instantiate the connection and authenticate to Office 365. Which Windows PowerShell cmdlet should you run?

- A. Set-SPOTenant -ExternalServicesEnabled -NoAccessRedirectUrl https:// contoso.sharepoint.com
- B. Connect-SPOService-Url https://contoso-admin.sharepoint.com -credential [email#160;protected]
- C. Set-SPOSiteGroup -Site https://contoso-admin.sharepoint.com -Identity Administrators
- D. Connect-SPOService-Url https://contoso.sharepoint.com -credential [email#160;protected]

Answer: B
