Answer: A

NEW QUESTION: 2

Your CRM system has an order that includes new broadband service order items to be provisioned and existing mobile service order items to be terminated in the network. Before sending this order for fulfillment, the customer requirements specify that the CRM system should send the same order items to the Order Management System to check whether it is feasible to fulfill the need.

Which entity in OSM would you use to differentiate between the orchestration plans that should be executed for each of these two (fulfill and check) orders?

- A. Order Recognition Rules
- B. Fulfillment Modes
- C. Orchestration Sequences
- D. Order Component Specifications
- E. Order item action code property

Answer: D

NEW QUESTION: 3

Which of the following statements is incorrect about the data migration process?

- A. Remove the source storage and delete the image relationship.
- B. Modify the storage mapping relationship on the host.
- C. Assign the LUNs on the target storage array to a host and ensure that the host can detect the LUNs.
- D. Replicate or migrate data using the third-party volume management software on the host.

Answer: B
