NEW QUESTION: 3

Identify the transformation type in which a transactional item attribute is used for transforming a product.

The transformation may be added to the existing product or replace the product on the sales order for a CTO item.

- A. Attribute to Attribute
- B. Attribute to Product
- C. Context to Product
- D. Product to Product

Answer: B

Explanation:

Explanation/Reference:

Explanation:

An attribute-to-product transformation uses transactional attributes to transform an attribute to an item number. It can add the transformation to an existing item or replace the item that the source order references. Assume your company receives orders for an MP3 player that includes a Color attribute and a Size attribute, and that you must use a combination of these

attributes to reference an item number. In the following example, a transformation rule transforms the Color and Size attributes of the Mini Plus item to the VIS481 item. Order Management displays VIS481 on the order line.
