- A. Allow Outbound on port 3306 for Destination Web Server Security Group (WebSecGrp)
- B. Allow Inbound on port 3306 from source 20.0.0.0/16

NEW QUESTION: 3

Scenario A customer is currently using third-party backup software for Oracle backups and writing backups to third-party physical tape libraries and a VTL. Backups sent to the VTL are then vaulted to tape and transported daily from the primary data center to the third-party facility.

They are experiencing high backup job failures with backup success rates of approximately 65%. In addition, their time to disaster recovery readiness for backups is greater than 24 hours. The retention period for database backups from disk-based backup is 4 weeks.

The customer is looking for a solution that will meet the following requirements:

Oracle DBA to manage backups through Oracle RMAN Backup their file system data using EMC backup software Perform monthly full backups directly to physical tapes for offsite storage Reduce the backup window to the possible maximum Increase the time to disaster recovery readiness. Increase the retention period for database backups from disk-based backup to 6 weeks No additional WAN bandwidth requirements Low TCO solution Free up the Fiber Channel switch infrastructure Increase operational efficiency

Refer to Scenario.

The customer is considering using an EMC Data Domain system. They would like to have a copy of the Oracle RMAN backups at their primary and disaster recovery sites.

Which Data Domain licenses are required for this solution while meeting the customer's requirements?

- A. Global Deduplication and Replication
- B. DD Boost and Replication
- C. Gateway and Replication
- D. VTL and Replication

Answer: B

Explanation:

NEW QUESTION: 4

A client wants to upgrade their Documented system from 5.3 SP3 to D6, but does not have the resources to upgrade and test web applications such as Webtop and Content Server components within a single downtime window. The client asks whether the upgrade can be phased, and if so which components should be upgraded first. What is the correct response to the customer's question?

- A. Web applications must be upgraded after the Content Server is upgraded.
- B. Web applications must be upgraded before the Content Server.
- C. Web applications may be upgraded before or after the Content Server is upgraded.
- D. Web applications do not need to be upgraded to make use of D6 features.

Answer: C
