NEW QUESTION: 3

The CIO of a company wants to start tracking inventory in the warehouse using RFID tags and their existing wireless network. The company hires a wireless engineer to ensure that their existing network can support this new initiative.

Which tool in Cisco Prime can help the wireless engineer?

- A. Site Survey
- B. Map Editor
- C. Planning Mode
- D. Location Readiness

Answer: D

Explanation:

Using Chokeypoints to Enhance Tag Location Reporting
Installation of chokeypoints provides enhanced location information for RFID tags. When an active Cisco-compatible Extensions Version 1-compliant RFID tag enters the range of a chokeypoint, it is stimulated by the chokeypoint. The MAC address of this chokeypoint is then included in the next beacon sent by the stimulated tag.

All access points that detect this tag beacon then forward the information to the controller and location appliance.
