NEW QUESTION: 1

A company wants to migrate its web application to AWS. The legacy web application consists of a web tier, an application tier, and a MySQL database.

The re-architected application must consist of technologies that do not require the administration team to manage instances or clusters.

Which combination of services should a solutions architect include in the overall architecture?

(Select TWO)

- A. Amazon Aurora Serverless
- B. Amazon Elasticsearch Service (Amazon ES)
- C. Amazon RDS for MySQL
- D. AWS Fargate
- E. Amazon EC2 Spot Instances

Answer: C,D

NEW QUESTION: 2

The recently lowered death rate in developing countries has caused the number of young children there to increase more quickly than in the past. In South America in 1950, 126 out of every 1000 infants died before reaching their first birthday. By 1990, 70 out of 1000 infants died before age one.

How does this change in the population growth rate most likely affect a country in South America?

- A. Demand for public health clinics will decrease.
- B. The average family size will probably decrease.
- C. More food, clothing, and schools will be needed.
- D. More jobs will be lost.
- E. Migration to other countries will stop.

Answer: C

NEW QUESTION: 3

In the first phase of IKE V1, the pre-shared key master mode exchange process, in which message is the SA payload sent?

- A. Message 1 and Message 2
- B. Message 7 and Message 8

Note: IKE V1 Phase 1 mainly negotiates the following three tasks: First, negotiate the parameters used to establish IKE SA: encryption algorithm, integrity verification algorithm, identity authentication method and authentication word, DH group, IKE SA life cycle, etc. . These parameters are defined in the IKE security proposal. The second is to use the DH algorithm to exchange information related to the key (the material for generating various keys), and the peer devices can use each of the key information to generate a symmetric key for ISAKMP message encryption and verification. The third is to verify each other's identity and use a pre-shared key or digital certificate to verify identity.

- C. Message 5 and Message 6
- D. Message 3 and Message 4

Answer: A
