í~ , í™~ë•©ë<^ë<α.

Answer: A

Explanation:

The disaster plan should embrace data center recovery, critical application recovery, and network recovery. It should be updated and current with regard to recent test results and new applications, equipment, and network configurations. The plan should also ensure that backup facilities are still able to process critical applications and that end-user responsibility is established. Another essential component of a disaster recovery plan is that backup/restart procedures have been anticipated and provided for in the application systems.
