When the administrator creates a linked clone desktop, he hopes that the desktop that the user logs in is the same every time, so which one should he choose?

Pooled desktop

- A. Dynamic Pool
- B. Single user pool
- C. Static pool
- D. Exclusive pool

Answer: C

NEW QUESTION: 3

An email user has been lured into clicking a link in an email sent by their company's security organization.

The webpage that opens reports that it was safe but the link could have contained malicious code. Which type of security program is in place?

- A. user awareness
- B. Physical access control
- C. Social engineering attack
- D. brute force attack

Answer: A

Explanation:

Explanation

This is a training program which simulates an attack, not a real attack (as it says "The webpage that opens reports that it was safe") so we believed it should be called a "user awareness" program. Therefore the best answer here should be "user awareness". This is the definition of "User awareness" from CCNA 200- 301 Official Cert Guide Book: "User awareness: All users should be made aware of the need for data confidentiality to protect corporate information, as well as their own credentials and personal information. They should also be made aware of potential threats, schemes to mislead, and proper procedures to report security incidents. " Note: Physical access control means infrastructure locations, such as network closets and data centers, should remain securely locked.

NEW QUESTION: 4

However, not all SnapMirror Snapshot copies are being transferred from storage system B to the XDP destination on storage system C.

In this scenario, which Snapshot copies will transfer

successfully?

- A. any Snapshot copy created within the last 24 hours
- B. only Snapshot copies with the SnapMirror label called sm_created
- C. all manually initiated SnapMirror transfers
- D. transfers initiated by a SnapMirror schedule

Answer: B
