And our website is truly very famous for the hot hit in the market and easy to be found on the internet, It is said that one step ahead of ten steps ahead, Since our customers aiming to IIA-BEAC-P1 study tool is from different countries in the world, and there is definitely time difference among us, we will provide considerate online after-sale service on our IIA-BEAC-P1 training guide twenty four hours a day, seven days a week, please just feel free to contact with us anywhere at any time.

Is it safe to buy this IIA IIA-BEAC-P1 braindump from your website, We are glad to meet your all demands and answer your all question about our IIA-BEAC-P1 training materials.

IIA-BEAC-P1 Exam 5-star Rating with a Huge Customer Base, We have technicians to examine the website at times, therefore we will offer you clean and safe online shopping environment if you choose us.

For the purpose of getting concepts across as easily as possible, we have used simple language, IIA-BEAC-P1 PDF + Testing Engine Package, A lot of people have given up when they are preparing for the IIA-BEAC-P1 Exam Content exam.

You can contact our online staff or you can choose to email us on the IIA-BEAC-P1 exam questions.

#### **NEW QUESTION: 1**

What are three techniques to mark DSCP values on an SRX Series device? (Choose three.)

- A. Layer 7 application-based DSCP rewriters.
- B. IDP attack action-based DSCP rewriters
- C. VLAN rewrite
- D. ALG-based DSCP rewriters
- E. 802.11Q

**Answer: A,B,D**

**NEW QUESTION: 2**

An installment for \$2,000 USD is due for payment on July 31, 2016. The installment has two discounts: the first discount date is June 15, 2016 for \$150 USD and the second discount date is June 30, 2016 for \$50 USD.

You submit a Payment Process Request with the following criteria:

- Payment Date = June 20, 2016
- Pay Through Date = July 30, 2016
- Date Basis = Due Date

What will be the resulting status of the installment and discount?

- A.** The installment is not selected because the due date is after the Pay Through Date.
- B.** The installment is selected and a discount of \$150 USD is applied.
- C.** The installment is selected and a discount of \$50 USD is applied.
- D.** The installment is selected and no discount is applied.
- E.** The installment is not selected because the discount dates are before the Pay Through Date.

**Answer: D**

**NEW QUESTION: 3**

Note: This question is part of a series of questions that use the same scenario. For your convenience, the scenario is repeated in each question. Each question presents a different goal and answer choices, but the text of the scenario is exactly the same in each question in this series.

Start of repeated scenario

You have a database that contains the tables shown in the exhibit. (Click the Exhibit button.)

You review the Employee table and make the following observations:

- Every record has a value in the ManagerID except for the Chief Executive Officer (CEO).
- The FirstName and MiddleName columns contain null values for some records.
- The valid values for the Title column are Sales Representative manager, and CEO.

You review the SalesSummary table and make the following observations:

- The ProductCode column contains two parts: The first five digits represent a product code, and the last seven digits represent the unit price. The unit price uses the following pattern: ####.##.
- You observe that for many records, the unit price portion of the ProductCode column contains values.
- The RegionCode column contains NULL for some records.

- Sales data is only recorded for sales representatives. You are developing a series of reports and procedures to support the business. Details for each report or procedure follow.

Sales Summary report: This report aggregates data by year and quarter. The report must resemble the following table.

Sales Manager report: This report lists each sales manager and the total sales amount for all employees that report to the sales manager.

Sales by Region report: This report lists the total sales amount by employee and by region. The report must include the following columns: EmployeeCode, MiddleName, LastName, RegionCode, and SalesAmount. If MiddleName is NULL, FirstName must be displayed. If both FirstName and MiddleName have null values, the word Unknown must be displayed/ If RegionCode is NULL, the word Unknown must be displayed.

Report1: This report joins data from SalesSummary with the Employee table and other tables. You plan to create an object to support Report1. The object has the following requirements:

- be joinable with the SELECT statement that supplies data for the report
- can be used multiple times with the SELECT statement for the report
- be usable only with the SELECT statement for the report
- not be saved as a permanent object

Report2: This report joins data from SalesSummary with the Employee table and other tables.

You plan to create an object to support Report1. The object has the following requirements:

Sales Hierarchy report. This report aggregates rows, creates subtotal rows, and super-aggregates rows over the SalesAmount column in a single result-set. The report uses SaleYear, SaleQuarter, and SaleMonth as a hierarchy. The result set must not contain a grand total or cross-tabulation aggregate rows.

Current Price Stored Procedure: This stored procedure must return the unit price for a product when a product code is supplied. The unit price must include a dollar sign at the beginning. In addition, the unit price must contain a comma every three digits to the left of the decimal point, and must display two digits to the left of the decimal point. The stored procedure must not throw errors, even if the product code contains invalid data.

End of Repeated Scenario

You need to create a query to return the data for the Sales Summary report.

Which three Transact-SQL segments should you use to develop the solution? To answer, move the appropriate Transact-SQL segments from the list of Transact-SQL segments to the answer area and arrange them in the correct order.

**Answer:**

Explanation:

## Explanation

Use two CTE expressions, one for salesYear and one for SalesQuarter, and combine them with a SELECT statement. Note: A common table expression (CTE) can be thought of as a temporary result set that is defined within the execution scope of a single SELECT, INSERT, UPDATE, DELETE, or CREATE VIEW statement. A CTE is similar to a derived table in that it is not stored as an object and lasts only for the duration of the query.
