**NEW QUESTION: 2**

You manage an application deployed to virtual machines (VMs) on an Azure virtual network named corpVnet1.

You plan to hire several remote employees who will need access to the application on corpVnet1.

You need to ensure that new employees can access corpVnet1. You want to achieve this goal by using the most cost effective solution.

Which two actions should you perform? Each correct answer presents part of the solution.

- A. Enable site-to-site connectivity for corpVnet1.
- B. Enable point-to-point connectivity for corpVnet1.
- C. Enable point-to-site connectivity for corpVnet1.
- D. Create a VPN subnet.
- E. Convert corpVnet1 to a regional virtual network.
- F. Create a gateway subnet.

**Answer: C,D**

Explanation:

A point-to-site VPN also allows you to create a secure connection to your virtual network. In a point-to-site configuration, the connection is configured individually on each client computer that you want to connect to the virtual network. Point-to-site connections do not require a VPN device. They work by using a VPN client that you install on each client computer. The VPN is established by manually starting the connection from the on-premises client computer. You can also configure the VPN client to automatically restart.

Reference: About Secure Cross-Premises Connectivity You manage a virtual Windows Server 2012 web server that is hosted by an on-premises Windows Hyper-V server. You plan to use the virtual machine (VM) in Azure.

**NEW QUESTION: 3**

Where do Cisco Meraki customers go to open and manage ongoing support cases?

- A. help section within the Cisco Meraki dashboard
- B. Cisco Meraki portal within Salesforce.com
