**NEW QUESTION: 1**

Electronic commerce is best described as

**A.** The buying of goods and services and paying for them

on-line.

- B. The buying of electronic equipment from a high street shop
- C. Advertising electronic goods on the Internet.
- D. Requesting information from companies selling electronic equipment.

**Answer: A**

**NEW QUESTION: 2**

An administrator has a network subnet dedicated to a group of users. Due to concerns regarding data and network security, the administrator desires to provide network access for this group only. Which of the following would BEST address this desire?

- A. Configure the switch to allow only traffic from computers based upon their physical address.
- B. Install a proxy server between the users' computers and the switch to filter inbound network traffic.
- C. Block commonly used ports and forward them to higher and unused port numbers.
- D. Install host-based intrusion detection software to monitor incoming DHCP Discover requests.

**Answer: A**

Explanation:

Section: Threats and Vulnerabilities

Explanation/Reference:

Explanation:

Configuring the switch to allow only traffic from computers based upon their physical address is known as MAC filtering. The physical address is known as the MAC address. Every network adapter has a unique MAC address hardcoded into the adapter.

You can configure the ports of a switch to allow connections from computers with specific MAC addresses only and block all other MAC addresses.

MAC filtering is commonly used in wireless networks but is considered insecure because a MAC address can be spoofed. However, in a wired network, it is more secure because it would be more difficult for a rogue computer to sniff a MAC address.

**NEW QUESTION: 3**

A supervisor has a requirement to record daily attendance of the labor or crew performing work.

Which applications can be used to record this information?

(Choose two.)

- A. Work Order Tracking
- B. Person Groups
- C. Crews
- D. Labor

**E.** Labor Reporting

**Answer: C,E**
